

Avast Business Antivirus

Advanced antivirus protection for all devices

Antivirus is the first line of defense against today's cyberthreats so it needs to be powerful. Avast Business Antivirus is an award-winning, full-featured antivirus solution for small and medium-sized businesses that keeps devices protected from today's sophisticated cyberthreats – whether it's a known ransomware variant or a never-seen-before, zero-day attack.

Block cyberthreats from entering your network

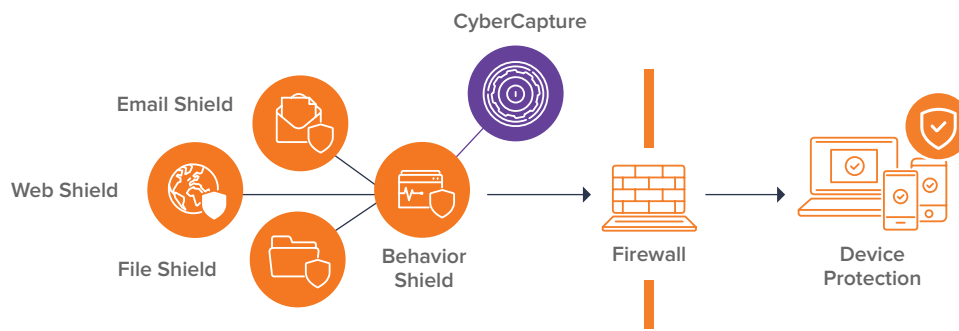

Our Web, File, Email, and Behavior Shields work together to actively analyze suspicious information coming and going from devices and block malicious files, dangerous websites, unusual behavior, unauthorized connections, and other threats.

Protect against zero-day attacks

All new, unknown, and rare malware variants found by our four-shield defense system are quarantined by CyberCapture, our proprietary technology that quickly scans suspicious files for deeper analysis in a safe cloud environment.

Predict and identify new threats

400 million+ active users in our network provide a continual stream of data that helps us quickly identify and destroy any threat – and predict future ones. Across the globe, our immense cloud-based machine-learning engine is evolving and learning, making our solutions smarter, faster, and more powerful than ever.

Features

File Shield

Scans files on devices to ensure they are malware-free.

Web Shield

Checks URLs to ensure a website is safe before a connection is made.

Email Shield

Inspects incoming and outgoing emails for malicious content.

Behavior Shield

Looks for suspicious behavior in programs installed on devices that may indicate malicious code.

CyberCapture

Detects and analyzes suspicious files in a safe, virtual environment.

Firewall

Monitors all network traffic between PCs and the outside world to prevent unauthorized communication.

Antispam

Keeps dangerous phishing emails and annoying spam from cluttering and compromising inboxes.

SmartScan

Scans for malware, outdated software, unsafe settings, and suspicious add-ons.

Sandbox

Lets users run applications, download files, and visit websites in a virtual environment that is isolated from the computer.

Wi-Fi Inspector

Scans networks for vulnerabilities, checks network, device, and router settings, and identifies threats.

Real Site

Protects against DNS hijacking to ensure the correct website is displayed.

Rescue Disk

Boots up a PC that's been infected with malware from a USB that contains a clean version of the system.

Security Browser Extension

Scans sites for authenticity and blocks malicious ads.

Available as standalone or with the management console.

Standalone Antivirus

Ideal for small and medium-sized businesses with four devices or fewer. Users can adjust device settings according to their preferences and maintain complete control of the data.

On-premise or Cloud Management Console

The management console makes it easy to deploy antivirus protection to multiple devices, manage all devices from one platform, schedule regular scans, and quickly add more devices.

About Avast Business

Avast Business provides integrated, enterprise-grade endpoint and network security solutions for SMBs and IT service providers. Backed by the largest, most globally dispersed threat detection network, the Avast Business security portfolio makes it easy and affordable to secure, manage, and monitor complex networks. The result is superior protection that businesses can count on.
